

PADI Enriched Air Diver

Why PADI Enriched Air Diver?

Maximize your time with the upgraded PADI Enriched Air Diver course.

Enriched Air Diver saves you time by allowing you to:

- Stay underwater longer
- Get back into the water sooner
- Get your certification while simultaneously completing dives for other PADI courses

Plus, by diving with Enriched Air you may feel less tired on your vacation.

How much more time can I be underwater?

For example, if you dive to 15 metres/50 feet on air, your no decompression limit is 80 minutes. But, diving on EANx36 gets you 220 minutes of no decompression time - an increase of 140 minutes! It's perfect for underwater photographers, wreck divers and anyone who wants to stay down longer.

What do I need to start?

All you need is your open water diver certification. (You must be 15 years of age or older).

What will I do?

You will learn preparation and diving procedures involved with enriched air diving.

How soon can I be diving on enriched air?

Just a mini workshop and a couple dives and you'll be on your way.

- Recommended Course Hours: 12
- Minimum Open Water Training: two dives over one day

What will I need?

You'll need your PADI Enriched Air Crew-Pak, which includes an Enriched Air 32 percent Table, Enriched Air 36 percent Table and Equivalent Air Depth/Oxygen Exposure Table.

Where can I go from here?

You can apply this Specialty course towards your Master Scuba Diver certification. You also need the PADI Enriched Diver certification if you intend to move into technical diving.
