

Navigation Diver

Why PADI Underwater Navigator?

When you're underwater, knowing where you are and where you're going comes in handy, especially if you're looking for that beautiful reef that you've heard all about. The PADI Underwater Navigator Specialty course will help you become a pro at finding your way underwater.

What do I need to start?

- PADI Open Water Diver or Junior Open Water Diver certified (or qualifying certification from another organization)
- Minimum age: 10 years old

What will I do?

During your PADI Underwater Navigator Specialty course, you'll learn underwater navigation dive procedures, techniques, planning, organization and potential problems. You'll also be introduced to natural navigation, underwater patterns, distance estimation and further your compass navigation skills. You'll put these into practice during your three open water dives.

How long will it take?

- Minimum Open Water Training: three dives over one day

What will I need?

- Navigation, manual, video

Where can I go from here?

Your Adventures In Diving Navigation Adventure Dive may count toward your Specialty course at instructor discretion. This Specialty also counts toward your Master Scuba Diver certification.

Health requirements

You are required to complete a medical statement; if you have any of the conditions listed, you will have to have your doctor sign the form to say you are fit to dive.

You are not permitted to enter the water without medical clearance.

Also you are required to sign a statement of acceptance of risk and also agree to comply with safe diving practices.

What next?

Contact seaurchindivers, confirm course dates and cost and then place your deposit to reserve your place

What does it Cost?

£140 including loan of your manual and video
